Skills

Mobile

React Native (Expo, CLI), Native Android/iOS

Frontend / Backend

React.js, Remix, Next.js, HTML5, CSS3, Solito, React Query, Axios, Node.js, Express, Auth0, Passportjs, REST APIs, GraphQL, AWS, Google Firebase, Heroku, Netlify, MySQL, PostgreSQL, MongoDB, Tailwind, Chakra, MUI, React Native Elements, React Native Paper, Native, Base, Tamagui, Storybook

Testing

Jest, Appium, WebDriverIO, Detox, Cypress, Mocha, Chai

CI/CD

Github Actions, Fastlane, CircleCI, Bitrise

UI/UX

Figma, Adobe XD

Agile Tools

Jira, Monday, Asana, Trello, GitHub, Bitbucket, Gitlab

Profile

I am Arslan Mushtaq, a seasoned tech professional with over 8 years of experience. My expertise spans across MedTech, FinTech, and EduTech. I am skilled in React Native, Next.js, Node.js, and Agile methodologies. I have a proven track record of leading projects from concept to delivery, integrating CI/CD practices for efficient development. My strengths lie in building scalable applications, managing databases, and fostering collaborative, agile environments for successful project execution.

Experience

○ Lead Frontend Developer

NOVOS, Remote   Apr 2023 - June 2024

As a Lead Frontend Developer, I led the creation and management of a mobile app and web module from scratch. Using Monday for team organization, I developed the app's infrastructure with Notion, Figma, and Terraform. I built the app with React Native, Redux, Redux RTK Query, and TypeScript. Enhancing productivity, I implemented CI/CD with Jenkins, App Center, and GitHub Actions, ensured robustness with Jest and Detox, maintained coding standards with ESLint and Prettier, and used Agile methodologies for success.

Achievements

- The application being free increased web traffic by 30% and boosted e-commerce sales by 15%.
- Thorough stress testing and implemented techniques allow the application to handle a million users.
- Enhanced user experience during pre-release resulted in users spending more time on the app than expected.

○ Senior React Native Engineer

S4 Digital, Remote   Oct 2021 - Mar 2023

As a Senior React Native Engineer, I enhanced an existing mobile app through pair programming with colleagues and developed key features using React Native. I maintained code quality with Jest unit tests and end-to-end testing using Appium/Webdriver. I proactively addressed issues across environments using Bitrise, Dynatrace, and Instabug. Additionally, I implemented efficient localization with Magnolia CMS and facilitated debugging and troubleshooting with Sentry and React Native Debugger.

Achievements

- Boosted E2E testing coverage from 45% to 96%
- Increased traffic by 3% through the implementation of new features.
- Enhanced localization efforts, resulting in an 8% rise in diverse traffic and enabling additional marketing strategies.

○ ## Associate React Native Engineer

Ecologix, Pakistan   Sep 2020 - Sep 2021

As an Associate React Native Engineer, I created custom mobile applications using React Native and developed full-stack applications integrated with technologies such as Node.js, Express, PostgreSQL, MySQL, MariaDB, Google Firebase, and Amazon Web Services. I optimized development processes with advanced JavaScript ES6 techniques and led a team of 12 developers, fostering collaboration and productivity. Additionally, I managed client requirements effectively, ensuring seamless communication and high client satisfaction.

Achievements

- Boosted monthly revenue from USD 0 to USD 18,000 by completing projects and introducing maintenance contracts.
- Secured over 8 clients, generating steady revenue for the Software Development Unit.
- Led a team of 8 to 12 developers and mentored 5 developers, contributing to a monthly revenue increase to half a million dollars yearly.

○ ## React Native Engineer

Juice Phactree - Remote   Sep 2015 - Aug 2020

I began my career in Native Android Development and later transitioned to the React Native framework, smoothly adjusting to the change. In this capacity, I adeptly incorporated popular React Native libraries and third-party APIs to ensure mobile apps ran seamlessly. I oversaw the complete lifecycle of mobile app development and deployment, taking full responsibility for architectural design and codebase maintenance. Furthermore, I provided extensive technical support and troubleshooting for the mobile applications I managed.

Achievements

- Pioneered mobile app development in a startup, acquiring clients and growing the team.
- Increased quarterly revenue from 8,000 CAD to 33,000 CAD through app and web development.
- Explored diverse areas like marketing and sales, gaining insights into digital marketing and finances.

Education

○ ## Bachelors of Computer Science

Minhaj University, Lahore   April 2015 - April 2020
